The application has been amended as follows:

Claims 21 and 22 are cancelled.

In claim 25, lines 1-2, remove "wherein the first and second electrical states coorespond to an on and off state, and".

### ***Allowable Subject Matter***

Claims 1-20 and 23-27 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 10 and 15, prior art fails to teach or reasonably suggest a non-contact electrical toggle switch that switches between a first and second electrical state in a manner that only corresponds how a conventional toggle switch would operate in response to detected movements that mimic movements required to physically switch a conventional toggle switch.
